Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

1. The drawings are objected to because fig 2 and 3 boxes need to be labeled descriptively. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The disclosure is objected to because of the following informalities: On page 2 specifically citing claims numbers is improper.

Appropriate correction is required.

3. Claim 1, 8, 13 20 is objected to because of the following informalities: In claim 1 master drive 11 should not be in parenthesis, just 11 should, only reference characters or numbers should be in parenthesis. The other claims cited have similar problems. Appropriate correction is required.

4. Claims 14-16 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. It is not proper to just cite a "preamble of claim 13 ".

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyashita et al as cited by applicant in view of Yoneda et al. Miyashita et al discloses method for controlling a production unit with at least one primary drive and at least one dependent drive whose movements depends directly or indirectly on the movement of a master shaft of master drive, characterized in that dependent drive is in each case assigned a servo actuator in that servo actuator determined from an input signal a desired value for independent drive and convey desired value to dependent drive, see fig 3 #1,2,4,5,16,17,15, and col 3 lines 45-60, col 4 lines 25-50, and col 5 lines 30-60. Miyashita et al lacks disclosing limit value. Yoneda et al discloses limit value, see col 2 lines 40-55. It would have been obvious to one of ordinary skill in the art to combine the

production unit of Miyashita et al with the limit value stored of Yoneda et al for synchronization error and preventing instability.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Prior art discloses synchronization.
